VARIABLE SPEED ELECTRIC CHAIN MOTOR

C O L U M B U S M C K I N N O N C O R P O R A T I O N

# **PRECISION CONTROL WITH FAST LIFTING SPEEDS**

Whether you need to quickly change out a set during a performance or remove heavy equipment from road cases for setup or maintenance, the CM-ET Prostar® VS is the ideal electric chain motor.

The Prostar VS provides precision control, fast lifting speeds and quiet operation – all in a compact and portable design. Variable speed capabilities let you easily configure the Prostar VS to the task at hand with an easy-to-use interface that allows operators to adjust the operating speed and motor performance right on the spot.

# PROSTAR® FAMILY AT A GLANCE

## CM-ET PROSTAR VS BRINGS THE SPEED

The CM-ET Prostar family of electric chain motors is known for its compact design, quiet operation and reliable performance. The Prostar VS rounds out this offering, providing precision control with fast lifting speeds that can be easily adjusted for the application.

Capacities	PROSTAR		PROSTAR VS	
	Speed (FPM)	Reeving	Min - Max Speeds (FPM)*	Reeving
250 lb.	16, 24, 40	1	3 to 63	1

## VARIABLE SPEED ELECTRIC CHAIN MOTOR

The CM<sup>®</sup> Prostar VS<sup>™</sup> variable speed electric chain motor is built for entertainment applications where precision load control is critical. This durable motor features a high H4-plus duty cycle and compact design ideal for unique rigging needs encountered at small venues.

**CAPACITIES: 250 TO 1,100 LB.**

**STANDARD LIFT: 10 FEET  
SPEEDS: UP TO 63 FT./MIN.**

### BENEFITS & FEATURES

#### RUGGED & DURABLE

Thermally protected motor. Rugged, cast aluminum alloy frame and body feature durable epoxy powder-coat finish to protect against corrosion.

#### LOW MAINTENANCE

Gear train lifetime lubricated with non-oxidizing grease. Totally enclosed frame protects motor from environmental contamination.

#### COMPACT DESIGN

Small, compact design makes motor ideal for use in tight spaces and allows for easy installation and maintenance.

#### OVERLOAD PROTECTION

Standard overload device protects the chain motor, operator and surrounding structure from damaging overloads.

#### LONG CHAIN LIFE

Durable CM Hoistaloy<sup>®</sup> Load Chain. 10-pocket, oblique-lay lift wheel for longer chain life.

#### SINGLE- & 3-PHASE VOLTAGE OPTIONS

100 to 240 volt single phase, 50 to 60 Hz.  
208 to 240 volt 3-phase.  
460 volt and 575 volt 3-phase with optional transformer.  
6-1/2 ft. power cord with removable molded, 3-prong, 115-volt plug.

#### H4 PLUS DUTY CYCLE

With 300+ motor starts per hour and Class F motor insulation, the Prostar VS outperforms the H3 rating of its major competitors.

#### 5:1 DESIGN FACTOR

#### NEMA 4 INDUSTRIAL-RATED CONTROL SYSTEM

### OPTIONAL FEATURES

#### VARIABLE CONTROLS

Choose from 2-speed, 2-step infinitely variable, 3-speed and 3-step infinitely variable controls for single and 3-phase applications.

#### DURABLE CHAIN CONTAINERS

Impact-resistant plastic/mesh or metal chain containers.

#### SWIVEL-HOOK SUSPENSION

#### LATCHLOK<sup>®</sup> HOOK & LUG SUSPENSION

Swivel Latchlok hook suspension rotates 360° for easy installation and positioning. Lug-mount suspension is also available.

CM-ET Prostar® VS shown  
with optional Latchlok hooks.

## ADJUST OPERATING SPEED QUICKLY AND EASILY

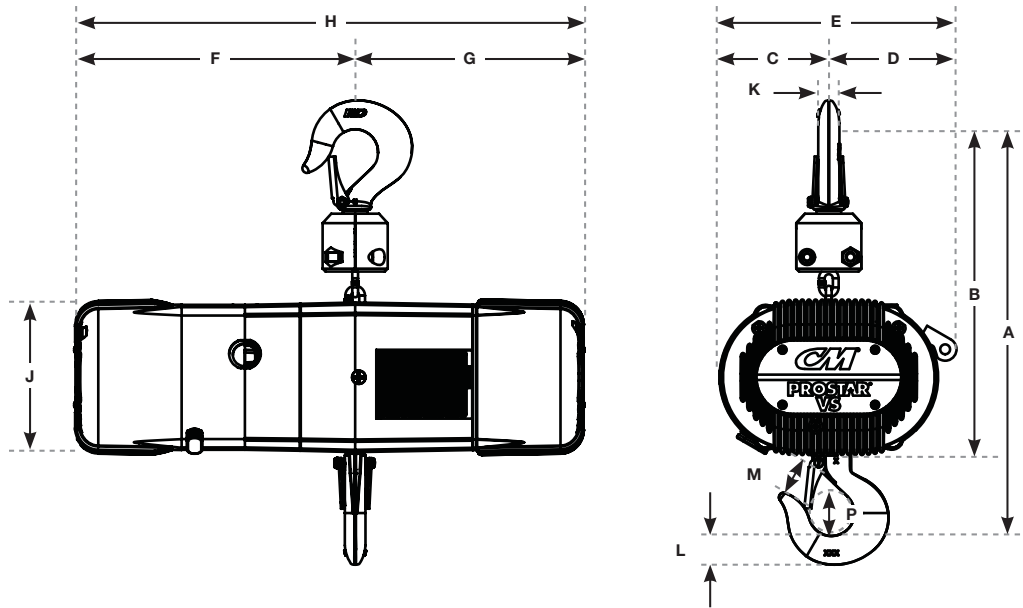

Easy-to-use interface allows for adjustment of chain motor operating speed, including acceleration and deceleration rates. Built-in error prevention ensures motor is programmed correctly. Performance information is provided, including start/stop cycles, motor run time, over-temp and over-current events, temperatures and fault information.

## SMOOTH-SWIVELING HOOKS

While positioning a load, especially at full capacity, operators can experience rotational resistance when using swivel hooks. To address this, Columbus McKinnon has incorporated needle roller thrust bearings into our swivel hook assemblies to eliminate rotational inertia – regardless of the load capacity. This ultimately helps ensure smooth and easy hook attachment and load positioning.
